

Car Parks

Miles Macadam manufacture and install Grouted Macadam surface courses which provide superior alternatives to traditional processes in high stress applications.

HARDICOAT™ is a **Resin Cementitious Grouted Macadam** specifically for **car parks**. It is a hybrid between asphalt and concrete, laid at 30mm thickness to provide a high strength, fuel resistant surface course.

Benefits include:

- **Resistant to power steering**
- **Resistant to chemical and fuel spills**
- **Resistant to salt**
- **Resistant to oxidation**
- **Resistant to deformation**
- **Colour options**

Miles Macadam has a long established client base and enviable product track record of resurfacing car parks and park and rides throughout the UK.
